

Works to Trees – Additional Guidance

Clearly mark the location and species of the tree(s) on a plan. The description of works needs to be clear and the reason for the works needs to be included. Please supply a contact telephone number because an appointment may be required to view the tree(s). No fee is payable for these applications.

Applications for works to protected trees are processed in a similar way to planning applications. You can check progress on your application in our [online database](#). We will either refuse consent or grant consent with conditions. Conditions typically require the planting of replacement trees, where trees are felled, or specify the standard and/or the timing of work and an expiration period.
