Dear Mr Middleton

Firstly I find it quite worrying that the green belt review which was due for publication in the middle of June was not made available until the 23rd August. I believe the reason given for the delay was that the council were liaising with the consultants. This calls into question about how independent this report actually is.

I also find it confusing that BrP 4 was included in the plan, when it is on an extremely dangerous bend and the only other access is on Bradmore Lane, which is not suitable for heavy traffic and would impact upon Water End.

Other sites, which appear far more suitable, being Brp6, 9 and 10 are more natural extensions of the existing boundaries and topographically provide visual separation.

Yours sincerely

Denise Barker
